DETAILED ACTION

Notice to Applicant

This communication is in response to the continued examination request with amendments received on 8/13/2009. Claims 31-43, 46-48 and 51 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven P. Wigmore on 9/8/2009.

During the interview conducted on 9/8/2009 between the Examiner and the attorney on the record, Mr. Wigmore, the application has been amended as follow:

Please amend claims 31, 41 and 46 as follows:

At lines 20-21 of claim 31, please amend:

...displaying a medical code adjacent to the billing code in the second window with the display device, the ~~billing~~ medical code comprising an alphanumeric string originating from a second medical source that is different from the first medical source and is associated with the selected medical concept; ~~and~~

At lines 24-26 of claim 31, lines 22-24 of claim 41 and lines 21-23 of claim 46, please amend:

receiving input comprising alphanumeric text through a third window on the display device ~~for one of~~ ; and

modifying, removing or creating relationships between said medical concepts.

Allowable Subject Matter

Claims 1-5, 7, 9-10, 12-13, 16-18 and 21 are allowed. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of these claims is the inclusion of the limitations, in all of the claims which is not found in the prior art references, of displaying a first image in a first window with the display device comprising an alphanumeric string representing the selected medical concept; displaying one or more second images with the display device and along one or more respective geometrical rays originating from a central region of the first image, each second image comprising an alphanumeric string representing a parent concept of the selected medical concept and displaying a first symbol on the display device along each respective geometrical ray originating from the central region of the first image; displaying a billing code comprising an alphanumeric string in a second window adjacent to the first window with the display device, the billing code originating from a first medical source associated with the selected medical concept; displaying a medical code adjacent to the billing code in the second window with the display device, the medical code comprising an alphanumeric string originating from a second medical source that is different from the first medical source and is associated with the selected medical concept; receiving input comprising alphanumeric
